ABSTRACT:

PURPOSE: To obtain a safe skin-beautifying cosmetic composition having high cosmetic effect.

CONSTITUTION: This skin-beautifying cosmetic composition is produced by compounding an extract of one or more vegetables selected from Baliospermum montanum belonging to the family Euphorbiaceae, neem (Melia azadirachta) belonging to the family Meliaceae and bhadrabala (Convolvulus arvensis) belonging to the family Convolvulaceae. The extract remarkably suppresses the melanogenesis and is free from cytotoxicity. Accordingly the skin-beautifying cosmetic composition containing at least one of these extracts has high safety and skin-beautifying effect.

ABSTRACTED-PUB-NO: JP 06199675A

BASIC-ABSTRACT:

A compsn. contg. an extract of a plant (I) of Meliaceae with an organic solvent of medium polarity and/or mono- and/or poly-hydric lower alcohol has antiinflammatory and antipruritic activity.

Pref. (I) is Neem (Melia azadirachta). The solvent is pref. benzene, ethyl ether, chloroform, methylene chloride, Et acetate, Bu acetate, acetone. MeOH, EtOH or 1,3-butylenediol.

USE/ADVANTAGE - The compsn. is useful as a medicine or cosmetic for external application.

In an example, branches and leaves of neem were heated in 3 l. refluxing ethyl ether. The extn. was repeated three times and the combined soln. was evapd. to give 5.5 g. extract powder. Macrogel ointment contg. the extract (5 wt.%) was applied on the right hind leg of Wister/ST rats. After 4 hrs., the ointment was swept off, and a saline soln. contg. cpd. 48/80 (10 micro-g/0.1 ml.) was injected hypodermically. 60 min. later the vol. of the leg was measured and the ratio of swelling was compared with that of a control gp. The ratio of swelling for the gp. treated with the extract was 30.8% whereas that for a control gp. was 58.6%, the inhibitory ratio was 47.4%.

INT-CL (IPC): A61 K 0/00

ABSTRACTED-PUB-NO: ZA 9802679A

BASIC-ABSTRACT:

NOVELTY - Preparation of an antiseptic herbal composition for treating burns, cuts and similar wounds involves: (a) disintegrating the herbal and mineral ingredients Parkar bark (*Ficus infectoria* Roxb), Neem Chhal bark (*Azadirachta indica*), Malkangi seed (*Celastrus*), Karani Chhal bark (*Pongamia pinnata*) and Saravan Geru (Octire); (b) pulverizing to form a powder; and (c) forming an aqueous extract of the powder.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is included for a herbal composition for treating burns, cuts and similar wounds, which contains the ingredients specified in (a).

ACTIVITY - Vulnerary; antibacterial; antifungal; dermatological.

MECHANISM OF ACTION - None given.

USE - The composition is useful for treating wounds such as burns, scalds, cuts, abrasions, cracks on the feet and hands, carbuncles, sunburn blisters or skin infections such as urticaria, eczema or scabies. It has antibacterial and antifungal activities, prevents and combats infection and accelerates healing.

ADVANTAGE - The composition is relatively soft, smooth and easy to use; has smoothing, cooling and antinfective effects; and promotes rapid healing, possibly

without leaving a scar.
